

Section 1. Identification of the Mixture and of the Company/Undertaking					
Product Identifier					
Product Name	Sodium Methoxide Powder (sodium methylate)				
Product State	Solid				
Product Form	Substance				
Product Number	Li.SMO.02				
Relevant Identified Uses of the Substance	e or Mixture and Uses Advised Against				
Use of the Substance or Mixture	Chemical intermediate For research and industrial use only				
	Organic synthesis				
	Sodium methoxide is a routinely used base in organic chemistry, applicable to the				
	synthesis of numerous compounds ranging from pharmaceuticals to agrichemicals. As				
	a base, it is employed in dehydrohalogenations and various condensations. It is also				
	a nucleophile for the production of methyl ethers.				
	Sodium methovide is used as an initiator of anionic addition polymerization with				
	ethylene oxide forming a polyether with high molecular weight. Biodiesel is prepared				
	from vegetable oils and animal fats, that is, fatty acid triglycerides, by				
	transesterification with methanol to give fatty acid methyl esters (FAMEs). This				
	transformation is catalyzed by sodium methoxide.

Potential Health Effects:	Reactivity Hazard: 2 Inhalation: May be Harmful if Inhaled. Material is Extremely Destructive to the Tissue of the Mucous Membranes and Upper Respiratory Tract. Skin: Harmful if Absorbed through Skin. Causes Skin Burns Eyes: Causes eye burns Ingestion: Harmful if Swallowed			
Sectio	on 3. Composition/ Information on Ingredient			
Hazardous Ingredients				
Chemical Name	Sodium Methylate			
Concentration	>99 %			
Cas-No.	124-41-4			
	Section 4. First Aid Measures			
Eye Contact	If wearing contact lenses, remove them. Wash eyes with plenty of clean and cool water			
	for at least 10 minutes while pulling eyelids up, and seek medical assistance			
Skin Contact	Remove contaminated clothing. Wash skin vigorously with water and soap or a suitable			
Ingestion	skin cleaner. NEVER use solvents or thinners			
ingestion	vomiting			
Most important symptoms and effects,	Corrosive Product, contact with eyes or skin can cause burns; ingestion or inhalation.			
both acute and delayed	Can cause internal damage, if this occurs immediate medical assistance is required.			
Indication of any immediate medical	In case of doubt or when symptoms of feeling unwell persist, get medical attention.			
attention and special treatment needed	Never administer anything orany to persons who are unconscious.			
	Section 5. Fire Fighting Measures			
Extinguishing Media				
Suitable Extinguishing Media	CO2, Dry Chemical and In case of spillage absorb with inert material (e.g. vermiculite,			
Unsuitable Extinguishing Media	Water oppinged Droduction Colled			
Special Hazard Arising from the	Combustible.			
Substanc <mark>e or</mark> Mixture	Vapors are Heavier than Air and may Spread Along Floor.			
	Forms Explosive Mixture with Air at Elevated Temperatures.			
	Development of Hazardous Combustion Gases or Vapors Possible in the Event of Fir			
	Carbon monoxide, carbon dioxide and Sodium oxide			
	May not Get in Touch with: Water			
	The Product Reacts with Water and Generates Heat.			
Advice for Fire Fighting	Stay in Danger Area Only with Self-Contained Apparatus. Prevent Skin Contact b			
	Reeping a safe distance of by wearing suitable Protective Clothing.			
	Section 6. Accidental Release Measure			
Personal precautions, protective	Wear respiratory protection. Avoid breathing vapours, mist or gas. Ensure adequate			
equipment and emergency procedures	ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware			
	of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. For personal protection, see section 8			
Environmental precautions	Do not Allow Material to be Released to the Environment Without Proper			
•	Governmental Permits.			
Methods and materials for containment	Pick up and Arrange Disposal Without Creating Dust. Sweep up and Shovel. Do not			
and cleaning up	Flush with Water. Keep in Suitable, closed containers for disposal.			
Reference to other sections	For disposal see section 13			
	Section 7. Handling and Storage			
Precautions for safe handling	ns for safe handling Information for Safe Handling:			
	Handle Under Dry Protective Gas			

Keep Container Tightly Sealed Store in Cool, Dry Place in Tightly Closed Containers Ensure Good Ventilation at the Workplace Open and Handle Container with Care

Information About Protection Against Explosions and Fires: Keep Ignition Sources Away Protect Against Electrostatic Charges Fumes can Combine with Air to Form an Explosive Mixture Requirements to be Met by Storerooms and Receptacles: Store in a Cool Location.

Information About Storage in One Common Storage Facility: Store Away from Water/Moisture. Store Away From Oxidizing Agents. DO NOT Store Together with Liquids.

Further Information About Storage Conditions: Store Under Dry Inert Gas. Protect From Humidity and Water. Keep Container Tightly Sealed. Store in Cool, Dry Conditions in well-Sealed Containers "Store Under Lock and Key and with Access Restricted to Technical Experts or Their Assistants Only".

Section 8. Exposure Controls/ Personal Protection

Control Parameter Exposure Cont<mark>rols</mark> Appropriate engineering controls

Conditions for safe storage, including

any incompatibilities

Personal protective equipment Eye/face protection

Skin protection

Properly Operating Chemical Fume Hood Designed for Hazardous Chemicals and Having an Average Face Velocity of at Least 100 Feet per Minute.

Tightly fitting safety goggles. Face shield (8-inch minimum). Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices.

Wash and dry hands.

The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

Full contact: Material: butyl-rubber Minimum layer thickness: 0.3 mm Break through time: 480 min Material tested: Butoject® (KCL 897 / Aldrich Z677647, Size M)

emical Production

Splash contact: Material: Nitrile rubber Minimum layer thickness: 0.4 mm Break through time: 30 min Material tested: Camatril® (KCL 730 / Aldrich Z677442, Size M) Complete suit protecting against chemicals, Flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the

Respiratory protection Control of environmental exposure General Protective and Hygienic Measures:	concentration and amount of the dangerous substance at the specific workplace. Where risk assessment shows air-purifying respirators are appropriate use (US) or type ABEK ¹ (EN 14387) respirator cartridges as a backup to enginee protection use a full- face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH ² (US) or CEN (EU). Prevent further leakage or spillage if safe to do so. Do not let product enter drains The usual precautionary measure for handling chemicals should be followed: Store protective clothing separately. Avoid contact with the eyes and skin.			
Se	ection 9. Physical and Chemical Properties			
Physical State Color pH Melting Point Boiling Point Flash Point Evaporation Rate Flammability (Solid, Gas) Molecular Weight of Sodium Methoxide Lower Explosion Limit Upper Explosion Limit Upper Explosion Limit Water Solubility Auto-ignition Temperature Vapour pressure Explosive Properties	Solid Powder White ca. 13 at 10 g/l, 68 °F (20°C) 261 °F (127°C) 662 °F (350°C) (decomposition) 91 °F (33°C), Method: DIN 51755 Part 1 No Information Available Highly Flammable Liquid and Vapor 54.03 g/mol 7.3 % 36 % at 68°F (20°C) (Reacts) 464°F (240°C) No Information Available Product is not Explosive. However, Formation of Explosive Air/Vapor Mistures is Possible.			
Reactivity Chemical Stability Possibility of Hazardous Reaction Conditions to Avoid Incompatible Material Hazardous Decomposition Products	Section 10. Stability and Reactivity Reacts Violently with Water. Stable under nitrogen in sealed containers. Neutralization can occur on contact with acids. In certain conditions, this may cause a polymerization reaction. Material decomposes slowly in contact with moist air and rapidly in contact with water. Heat, Sparks, Open Flame. Acids. Alcohols. Carbon dioxide. Esters. Halogens. Ketones. Chlorinated Solvents. Moist air. Water. Caustic organic vapors. Methanol. Sodium hydroxide. Sodium oxide.			
	Section 11. Toxicological Information			
Information on toxicological effects	Repeated or prolonged contact with the product can cause the elimination of oil from the skin, giving rise to non-allergic contact dermatitis and absorption of the product through the skin. a) acute toxicity; Not conclusive data for classification b) skin corrosion/irritation; Product classified:			

¹ ABEK

A (Brown) Organic vappours and gases with boiling point >65C

B (Gray) Inorganic gases excluding carbon monoxide

E (Yellow) Sulphur dioxide and acidic gases

K (Green) Ammonia and organic ammonia derivatives

Skin Corrosive, Category 1B: Causes severe skin burns and eye damage.

c) serious eye damage/irritation; Strong Corrosive Effect. Irritating Effect. d) respiratory or skin sensitisation; Not conclusive data for classification. e) germ cell mutagenicity; Not conclusive data for classification f) carcinogenicity; Not conclusive data for classification g) reproductive toxicity; Not conclusive data for classification h) STOT-single exposure; Based on available data, the classification criteria are not met. i) STOT-repeated exposure; Not conclusive data for classification i) aspiration hazard; Not conclusive data for classification. Ingredients Sodium Methylate Acute Oral Toxicity LD50 Rat: 2,037 mg/kg (RTECS) Acute Dermal Toxicity LD50 Rat: >2000 mg/kg (IUCILD) Corrosive materials are acutely destructive to the respiratory tract, eyes, skin and digestive tract. Eye contact may result in permanent damage and complete vision loss. Inhalation may result in respiratory effects such as inflammation, edema, and chemical pneumonitis. May cause coughing, wheezing, laryngitis, shortness of breath, headache, nausea and vomiting. Ingestion may cause damage to the mouth, throat and esophagus. May cause skin burns or irritation depending on the severity of the exposure. Additional Toxicological Information "To the Best of our Knowledge the Acute and Chronic Toxicity of This Substance is not Fully Known." Danger Through Skin Absorption. Swallowing will Lead to a Strong Corrosive Effect on Mouth and Throat and to the Danger of Perforation of Esophagus and Stomach. Section 12. Ecological Information No Information Vailable **Eco-toxicity** No Information Vailable Persistence and Degradability **Bio-accumulative Potential** No Information Vailable **Mobility in Soil** No Information Vailable **Section 13. Disposal Considerations** Waste disposal recommendations Offer Surplus and non-recyclable solutions to a licensed disposal company. Contact a licensed professional waste disposal service to dispose of this material. Dissolve or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber. **Additional information** Handle empty containers with care because residual vapors are flammable. Avoid release to the environment. **Ecology - waste materials**
